

St Therese School Goals

St Therese School is a place of Faith:

Like St Therese we do little things really well

This goal encourages us to live our lives like St Therese, doing little things for others with great joy, living our lives closer to Christ through her little way. We don't have to change the world with our actions but we can make a small contribution. She explains how to become a happier person by doing something kind for someone else. She is our special saint. She knows us and wants us to remember that Jesus loves us today and always, no matter what, forever and ever.

St Therese School is a place of knowledge:

We love learning

This goal speaks to us of the importance of knowledge and inspires us towards a love of learning. We don't want our children to leave us with their heads jam-packed full of facts but rather to have the skills to know how to access information and to enjoy using it.

St Therese School is a place of community

We are one small school with many cultures

This community goal is all about belonging. We are one small school with many cultures. Our small school is like a family in which each child is known and loved. It is a place where different cultures are celebrated.

St Therese School is a place of growth

We dare to do right 'Kia kaha ki te tika'

This goal is about becoming the best person we can be. In this goal we celebrate each child, no matter what their talent or ability. This goal challenges us to stand tall, take responsibility for our actions and share our gifts with others.
